Please READ CAREFULLY

THIS is a supplementary list to my recent catalogue, from which I have selected, to my mind, the more choice and desirable alpines and rock plants, the majority of which are hardy in every section of the United States. If you have not received my regular catalogue, which contains much valuable information regarding the proper habitat, soil, exposure, etc., of these plants, it will be forwarded to you for the sum of twenty-five cents. It also gives the seasons of bloom, height, color, etc., and whether lime-loving plants

Trade Discount 20% Orders \$10 to \$25 331/3% \$25 to \$100

produce only the choicest and best stock that years of experience I have never offered better an I am offering this season.

onage highly, and wish you to know that I to keep your good will. I believe you will hare all two-year-old field-grown plants, with ts which I keep potted up), my selection of good as can possibly be offered by anyone, pay to others.

Non-warranty is a condition of all sales made. On account of the great number of causes of failure over which I could have no control, I can assume no responsibility after stock has left my nursery. I use only the most up-to-date methods of packing, for which I make no charge, but I am obliged to make it a custom not to accept any order under \$2.50. All orders will be sent out parcel post collect, and my new prices make it necessary that check or money order accompany order.

As it is necessary sometimes to substitute, I would appreciate it if a short list of other plants desired is sent with order, as I don't care to substitute unless authorized to do so, and it saves time and disappointment if a few extras are suggested.
